DETAILED ACTION

Status of Claims

1. This action is in response to the amendment filed on 08 December 2005 and the subsequent RCE filed on 27 December 2005.
2. Claims 7, 8, 14, 16, 20, 21, 32, 39, and 40 have been amended.
3. Claims 7-21 and 32-40 are pending and have been examined.

RESPONSE TO ARGUMENTS

4. Applicant's arguments with respect to the claims have been considered but are moot in view of the new ground(s) of rejection. Referring to the previous Office action, Examiner has cited relevant portions of the references as a means to illustrate the systems as taught by the prior art. As a means of providing further clarification as to what is taught by the references used in the first Office action, Examiner has expanded the teachings for comprehensibility while maintaining the same grounds of rejection of the claims, except as noted above in the section labeled "Status of Claims." This information is intended to assist in illuminating the teachings of the references while providing evidence that establishes further support for the rejections of the claims.

Applicant argues that the prior art of record does not disclose that it is the issuer of the account that takes responsibility for verifying the identity of the customer as the owner of the account during a registration process. The Examiner disagrees and points to Barnes, at least Figure 5 as well as associated text, wherein Barnes discloses the procurement system, which handles the registration process and subsequent authentication procedures.

Claim Rejections - 35 USC § 103

5. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

6. Claims 7-21 and 32-40 rejected under 35 U.S.C. 103(a) as being unpatentable over Barnes et al. (US 5,970,475 A) in view of O'Mahony et al. "Electronic Payment Systems" (1997).

Examiner's Note: The Examiner has pointed out particular references contained in the prior art of record within the body of this action for the convenience of the Applicant. Although the specified citations are representative of the teachings in the art and are applied to the specific limitations within the individual claim, other passages and figures may apply. Applicant, in preparing the response, should consider fully the entire reference as potentially teaching all or part of the claimed invention, as well as the context of the passage as taught by the prior art or disclosed by the Examiner.

Claims 7-13, 16, 18-21, and 32-40:

Barnes, in at least Figures 1-4 and 9 as well as column 3, line 39 to column 4, line 4 as well as other related and applicable text discloses an online merchant/consumer purchasing system with payment verification that includes customer password and account verification, servers, databases, enrollment, automated payments, and security procedures to effect electronic commerce. Barnes does not involve a trusted party for the purposes of authentication during a

Art Unit: 3621

transaction. O'Mahony, however, in at least Chapter Four discusses in great detail three and four party payment systems wherein a trusted party verifies consumers and merchant s and authenticates financial transactions. It would have been obvious to one of ordinary skill at the time of the invention to combine Barnes' online purchasing and bill-paying system with O'Mahony's Electronic Payment Systems because it provides a user-friendly and secure environment for facilitation electronic commerce.

7. Claims 14, 15, and 17 are rejected under 35 U.S.C. 103(a) as being unpatentable over Barnes/O'Mahony in view of Asay et al. (US 5,903,882 A).

Claims 14, 15, and 17:

Barnes/O'Mahony disclose the online purchasing and bill-paying system as shown above. Barnes/O'Mahony do not disclose digital signatures and hashes. Asay, however, in at lest column 38, lines 33-44 does. It would have been obvious to one of ordinary skill at the time of the invention to combine Barnes' online purchasing and bill-paying system with use of digital signature technology because it would increase the security of the online transaction.
